The second showcase exhibition during Rembrandt Year 2019 presents two artists determined to find an answer:

Rembrandt Harmensz. van Rijn, who sought to capture the atmosphere, the uniqueness, of a particular stretch of land, and Frisian artist Jan van der Kooi, who uses traditional methods and drawing techniques to discover the inner being, the intrinsic power, of people, animals, and landscapes.

Van der Kooi's (*1957) more than 150 sketchbooks will be on view for the first time in this exhibition and will be shown alongside a selection of Rembrandt's landscape etchings.

PLEASE NOTICE: showcase exhibitions always by prior appointment (05452.91683500 or fuehrungen@draiflessen.com), guided tour included

Catalogue

The exhibition will be accompanied by a trilingual publication (German, Dutch, English).
